

What is a DBM-1?

Included with your purchase is a Database Migration tool (DBM-1), a computer program that automatically creates your database for you. People simply register on the DBM-1 page by inputting the required information and selecting any alerts from the list of which they choose to be notified.

Disclaimer:

The delivery of text messages can not be guaranteed as there are many components that go into successful messaging. These components include but are not limited to Internet capability, signal strength, structures, buildings, topography, geography, server robustness, provider network integrity, etc. Any of these may impact the quality of service and deliverability. While no system can ensure 100% delivery, SAFE COMMAND® offers the fastest and most reliable method available.

Xstream MOBILE SOLUTIONS corp.

Rapid Notification System

- Emergency School Cancellation
- Severe Weather Issue
- Contagious Disease Outbreak
- Power Outage
- Nearby Fire or Gas Leak
- Early Dismissal

How Do You Respond?

Xstream Mobile Solutions has created the ultimate communication system!

Utilizing Text Messaging, alerts can be sent to any cellular device (cell phone, pager, PDA, etc.) This technology has been proven to be the most effective and most affordable of all mass communication products.

Do your phone trees take too long?

By simply logging into our web interface with your password, you can access your customer database and send hundreds or thousands of text messages in seconds. This gives you the ability to contact parents at any time, wherever they may be, faster and more reliably than ever before.

Text Messaging utilizes 21st century concepts and state-of-the-art technology to deliver critical messages in the event of an emergency. Text messaging employs “**search and deliver**” technology meaning it continues to search for the cell phone (or other cellular device) until it delivers the message. Messages also travel on a “data network” which is much more resilient than voice networks, giving you a faster and more reliable delivery system.

All XSM customer’s **databases** are stored at our Equinix IBX-Chicago Center (Internet Business Exchange), which serves as a secure critical core hub for IP networks and internet operations worldwide.

Why have so many schools, counties and municipalities put their trust in Xstream Mobile Solutions?

- **Experience**
- **Provider Relationships**
- **Reliability**
- **Proprietary Technology**
- **State-of-the-Art Infrastructure**

Xstream Mobile Solutions has been active in emergency communication at the municipal and county level for years. It is this same technology that you will have at your fingertips. Here are a few of our current satisfied customers:

- **Will County EMA**
- **Kankakee County Sheriff**
- **Northern Illinois University**
- **New Lenox Police Department**
- **Metro East ERT**
- **Lemont EMA**
- **Over 75 Schools grades K-12**

“I think it’s a great way to reach the students in the event of a disaster. That’s the most efficient way. Nowadays, everybody is texting. Kids text all the time, especially college students. It’s the best way to communicate.”

-Walter Czerniak
Associate Vice President of
Information Technology Services,
Northern Illinois University

“During a crisis or emergency situation, communication between the schools and parents is critical. [Xstream Mobile Solutions] School Alert’s state-of-the-art technology can do this. A deluge of calls during a crisis can overload communication systems, making voice calls on cell phones or land lines virtually impossible. But because text messaging requires fewer network resources, the system isn’t prone to overloading and the communication is much more likely to be received.”

- Greg Murphy
Assistant to the Regional
Superintendent of Schools
I-KAN
